

Shop Environmental and Safety Quiz #2

# Hazard Communications

- 1.) OSHA's Hazard Communication Standard requires employees to be trained on: a) hazardous materials they use; b) how to find information on those materials; c) how to protect themselves; d) how to handle hazardous material; e) emergency response; f) all of the above. \_\_\_\_\_
- 2.) You are required to have a Safety Data Sheet (SDSs) on every "covered" product and may not use the product until you have the information at your facility and the user is trained in its use. T or F
- 3.) Materials purchased in small quantities and used in a fashion as one may use them at home, e.g., toilet bowl cleaner and office-cleaning products, do not require a Material Safety Data Sheet. T or F
- 4.) A material is not considered hazardous unless it is a combustible or flammable. T or F
- 5.) A chemical or product transferred to a smaller container that will be used up by the end of the shift does not need to be labeled. T or F
- 6.) Written Hazard Communication Program must include: a) the hazard classification of all hazardous materials used in the workplace; b) name and position of person responsible for implementing the program; c) employee exposure and health records for 10 years; d) provisions for employee training; e) all of the above. (circle the correct answers)
- 7.) Circle which of the following is not an acceptable practice for avoiding automotive and diesel exhaust: a) attaching a flexible hose to the exhaust and venting it outside; b) opening doors for cross ventilation, c) relying on wall-mounted fans; d) running engines only when necessary.
- 8.) Metal and plastic body parts may be covered by HCS, if used in a way that could cause exposures such as sanding, welding, grinding and cutting. T or F
- 9.) A technician must understand how to use person protective equipment (PPE) if necessary when handling hazardous materials. T or F
- 10.) Safety data sheets are required for hazardous wastes and byproducts. T or F
- 11.) The purpose of the HCS is to minimize short term and long term injuries and illnesses from employee exposures to hazardous materials. T or F
- 12.) Which of the following is not an acceptable practice for avoiding automotive and diesel exhaust: a) attaching a flexible hose to the exhaust and venting it outside; b) opening doors for cross ventilation; c) relying on wall-mounted fans; d) running engines only when necessary. Circle answer(s).
- 13.) Which of the following materials are not covered under HCS: a) diesel fuel; b) paints; c) battery acid; d) toilet bowl cleaner? Circle answer(s)
- 14.) Which of the following materials are not covered under HCS?: a) solvents; b) batteries; c) compressed gases; d) oily rags
- 15.) Many of the hazardous materials used in the shop such as welding fumes, chemical strippers and gasoline fumes can cause liver, kidney and neurological damage over the long term. T or F

**My supervisor has provided:**

- Live or video training
- On-floor demonstrations
- Explained SDSs and Labeling

- Answers to my questions
- Other written or online materials
- Other type of training:
